EDITORIALS

1, 43, 89, 90, 91, 139, 179, 221, 222, 267, 268, 269, 307, 349, 350, 391, 392, 435, 481

REVIEW PAPERS

Adams F: Traceability and analytical chemistry 308
Bremser W: New tools: Uncertainty-based data evaluation 398
Collins BL: Update on the activities of the National Cooperation for Laboratory Accreditation 351
Locke JW: Development of laboratory accreditation in the United States 356
Williams A: Introduction to measurement uncertainty in chemical analysis 92
Zschunke A: Global comparability of analytical results 393

GENERAL PAPERS

Andersson HOF: The rational use of proficiency tests and intercomparisons 224
Barwick VJ → Ellison SLR
Beaven P → Neidhart B
Bremser W, Hässelbarth W: Shall we consider covariances? 106
Ellison SLR, Barwick VJ: Estimating measurement uncertainty: reconciliation using a cause and effect approach 101
Ellison SLR: ISO uncertainty and collaborative trial data 95
Ellison SLR, Williams A: Measurement uncertainty and its implications for collaborative study method validation and method performance parameters 6
Hässelbarth W → Bremser W
Heydorn K: The interpretation and use of stability data in the certification of reference materials 111
Huber L: Qualification and validation of software and computer systems in laboratories – Part 2: Qualification of vendors 2
Huber L: Qualification and validation of software and computer systems in laboratories – Part 3. Installation and operational qualification 140
Huber L: Qualification and validation of software and computer systems in laboratories – Part 4. – Evaluation and validation of existing systems – Hewlett-Packard GmbH, Waldbronn 317
Lamberty A → Pauwels J
Mummenhoff W → Neidhart B
Neidhart B, Mummenhoff W, Schmolke A, Beaven P: Analytical and legal aspects of the threshold limit value concept 44
Noack S: New tools: Expert systems for uncertainty budgets 436
Pauwels J, Lamberty A, Schimmel H: Homogeneity testing of reference materials 51
Pauwels J, Lamberty A, Schimmel H: The determination of the uncertainty of reference materials certified by laboratory intercomparison 180
Schimmel H → Pauwels J
Schmolke A → Neidhart B
Serapinas P: Uncertainty – statistical approach, 1/f noise and chaos 145
Tholen DW: Statistical treatment of proficiency testing data 362
Williams A → Ellison SLR

SHORT CONTRIBUTIONS

Fabry L → Hoelzl R
Hässelbarth W: Uncertainty – The key topic of metrology in chemistry 115
Hoelzl C → Hoelzl R
Hoelzl R, Hoelzl C, Kotz L, Fabry L: The optimal amount of isotopic spike solution for ultratrace analysis by isotope dilution mass spectrometry 185
Kaus R: Detection limits and quantitation limits in the view of international harmonization and the consequences for analytical laboratories 150
Kotz L → Hoelzl R

PRACTITIONER'S REPORTS

Aboul-Enein HY → Buzoianu M
Aboul-Enein HY → Stefan R-I
Alink A → van der Veen AMH
Beck II CM: A traceability protocol to the SI by gravimetric analysis 482
Bettencourt da Silva RJN, Camões MFGFC, Seabra e Barros J: Validation of the uncertainty evaluation for the determination of metals in solid samples by atomic spectrometry 155
Bode P, Heydorn K, Innes RW, Wood R, Zeisler R: Basic steps towards a self-sustainable quality system and laboratory accreditation 197
Boley N: Benefits arising from proficiency testing schemes: The comparison of analytical methods 459
Broos AJM → van der Veen AMH
Buzoianu M, Aboul-Enein HY: Traceable measurements in clinical laboratories 270

Buzoianu M: Measurement uncertainty and its meaning in legal metrology of environmental chemistry and public health 328
Cammann K, Kleiböhmer W: Need for quality management in research and development 403
Camões MFGFC → Bettencourt da Silva RJN
Chouanière D → Moulin JJ
Clavel T → Moulin JJ
De Bièvre P → Lamberty A
De Bièvre P → Van Nevel L
Diaz E → Gerboles M
Failla O → Stringari G
Flinchbaugh DA, Poholarz JM: Use of ISO Guides 25, 30, 31, 34, 35, and 9001 in re-engineering Bethlehem Steel Corporation's analytical chemistry reference materials program 367
Gerboles M, Diaz E, Noriega-Guerra A: Uncertainty calculation and implementation of the static volumetric method for the preparation of NO and SO_2 standard gas mixtures 69
Golze M: Customers' needs in relation to uncertainty and uncertainty budgets 227
Graevenitz A von → Siegrist HH
Gramlich JW → Lamberty A
Grasserbauer M → Linsinger TPJ
Haapala K, Lattunen H, Mäkinen I: EAL interlaboratory comparison Wa1 – Testing of potable water 485
Hädrich J → Vogelgesang J
Henrion A: In- and off-laboratory sources of uncertainty in the use of a serum standard reference material as a means of accuracy control in cholesterol determination 127
Heumann KG → Van Nevel L
Heydorn K → Bode P
Innes RW → Bode P
Kadis RL: Evaluating uncertainty in analytical measurements: the pursuit of correctness 237
Kandler W → Linsinger TPJ
Kleiböhmer W → Cammann K
Krska R → Linsinger TPJ
Küppers S: Is the estimation of measurement uncertainty a viable alternative to validation? 412
Kurfürst U: Consideration of the uncertainty in the CRM value with the analysis of solid materials using atomic spectrometry – Part 1. Evaluation and benefit of method uncertainty using certified reference materials 406
Lamberty A, Savory J, Moody JR, De Bièvre P, Rosman KJR, Gramlich JW: The IRMM International Measurement Evaluation Programme (IMEP) IMEP-4: Trace elements (Li, Cu, Zn) in serum 447
Lattunen H → Haapala K
Linsinger TPJ, Kandler W, Krska R, Grasserbauer M: The influence of different evaluation techniques on the results of interlaboratory comparisons 322
Mäkinen I → Haapala K
Massin N → Moulin JJ
Möller F → Stringari G
Moody JR → Lamberty A
Moody JR → Van Nevel L
Mouillet L: Key requirements for introducing quality assurance in measurement laboratories 11
Moulin JJ, Clavel T, Chouanière D, Massin N, Wild P: Implementation of ISO 9002 for research in occupational epidemiology 488
Noriega-Guerra A → Gerboles M
Örnemark U → Van Nevel L
Pancheri I → Stringari G
Poholarz JM → Flinchbaugh DA
Pünter-Streit V → Siegrist HH
Ríos A, Valcárcel M: A view of uncertainty at the bench analytical level 14
Rosman KJR → Lamberty A
Savory J → Lamberty A
Seabra e Barros J → Bettencourt da Silva RJN
Siegrist HH, Pünter-Streit V, Graevenitz A von: The Swiss External Quality Assessment Scheme in Bacteriology and Mycology 1992–1996 203
Stefan R-I, Aboul-Enein HY: Validation criteria for developing ion-selective membrane electrodes for analysis of pharmaceuticals 194
Stringari G, Pancheri I, Möller F, Failla O: Influence of two grinding methods on the uncertainty of determinations of heavy metals in atomic absorption spectrometry/electrothermal atomisation of plant samples 122
Taylor PDP → Van Nevel L
Thompson M: Uncertainty of sampling in chemical analysis 117
Valcárcel M → Ríos A
van der Veen AMH, Alink A: A practitioner's approach to the assessment of the quality of sampling, sample preparation, and subsampling 20
van der Veen AMH, Broos AJM, Alink A: Relationship between performance characteristics obtained from an interlaboratory study programme and combined measurement uncertainty: a case study 462
Van Nevel L, Taylor PDP, Örnemark U, De Bièvre P: The International Measurement Evaluation Programme (IMEP): Full graphical presentation of results from IMEP-6, "Trace elements in water", on the Springer-Verlag website 444
Van Nevel L, Taylor PDP, Ornemark U, Moody JR, Heumann KG, De Bièvre P: The International Measurement Evaluation Programme (IMEP) IMEP-6: "Trace elements in water" 56
Vogelgesang J, Hädrich J: Limits of detection, identification and determination: a statistical approach for practitioners 242
Wells RJ: Validation requirements for chemical methods in quantitative analysis – horses for courses? 189
Wild P → Moulin JJ
Willetts P, Wood R: Measurement uncertainty – a reliable concept in food analysis and for the use of recovery data? 231
Wood R → Bode P
Wood R → Willetts P
Zeisler R → Bode P

DISCUSSION FORUM

Aboul-Enein HY: Some considerations in the use of internal standards in analytical method development 497

Albutt KJ: An accredited laboratory's view of customer expectations 279
Andersson HOF: Relevant elements of laboratory competence 281
Bouchand JA, Bourguignon JB: Laboratories and the use of analysis results 283
Bourguignon JB → Bouchand JA
Bremser W → Hässelbarth W
Desimoni E, Mannino S: Uncertainty of measurement and legislative limits 335
Forstén J: Can the new ISO Guide 25/EN 45001 create better confidence in laboratory operations? 256
Forstén J: Controlling the quality of testing 285
Hässelbarth W, Bremser W: Derived measurement standards of reduced uncertainty – A contradiction? 337
Jensen H: What does industry expect from laboratories? 258
Knoth J → Neidhart B
Kuselman I: To what extent can an uncertainty calculation be general? 131
Mannino S → Desimoni E
Neidhart B, Knoth J, Schwenke H: The potential of TXRF as a primary method in chemical metrology 470
Ots H: Will accreditors ever be able to satisfy the expectations of their customers? 280
Oussoren W → Visser RG
Rösslein M → Wampfler B
Schwenke H → Neidhart B
Visser RG, Oussoren W: Remarks on Linsinger TPJ, Kandler W, Krska R, Grasserbauer M (1998) "The influence of different evaluation techniques on the results of interlaboratory comparisons". Accred Qual Assur 3:322–327 497
Wampfler B, Rösslein M: How accurate must a reference material be? 468

LETTERS TO THE EDITOR

Malissa sen. H: Chemical lawyers 278
Neidhart B: Comments on Traceable measurements in clinical laboratories. Accred Qual Assur (1998) 3:270–277 472

POLICIES AND CONCEPTS

Brinkmann K: EAL interlaboratory comparisons: a prerequisite for establishing mutual recognition agreements between accreditation bodies 292
Bryden A: Improving cost effectiveness in the assessment of laboratories 291
Fajgelj A, Parkany M: Information on the Activity of the IUPAC Interdivisional Working Party on Harmonization of Quality Assurance Schemes for Analytical Laboratories 163
Fodor P → Hlavay J
Gerlach K → Jäger W
Golc-Wondra A → Prosek M
Hässelbarth W: Measurement uncertainty procedures revisited: Direct determination of uncertainty and bias handling 418
Hlavay J, Ring R, Fodor P: The Hungarian accreditation process 161
Holmgren M: The Scope of Accreditation and Consideration of Methods and Criteria for the Assessment of the Scope 27
Holmgren M: Validation of test methods. General principles and concepts 29
Ischi H: The effective and efficient assessment of competence of testing laboratories applying for accreditation 288
Jäger W, Gerlach K: Accreditation and authorization in environmental analysis. Development and trends 416
Julin A: European Quality Promotion Policy for improving the competitiveness of european industry 208
Julin A: Laboratories in the European Conformity Assessment Process 258
Juniper IR: The NATA scheme for accreditation of certifiers of reference materials 79
Krasnja A → Prosek M
Lauwaars M: Methods validation: AOAC's three validation systems 32
Lindholm G: The role of Nordtest in testing and quality assurance 296
Parkany M → Fajgelj A
Parr JL: Accreditation for United States environmental laboratories 376
Prosek M, Golc-Wondra A, Krasnja A: QASKI – the quality assurance system of the National Institute of Chemistry 499
Rath K: APLAC Mutual Recognition Agreement Finalized 210
Ring R → Hlavay J
Steinhorst A: Accreditation of types of tests 294
Unger PS: The American Association for Laboratory Accreditation 373

LEGISLATION AND NORMS

Hey H: Different approaches to legal requirements on validation of test methods for official control of foodstuffs and of veterinary drug residues and element contaminants in the EC 211
Kohl H: The new ISO 17025 – basic idea 422

MEETING REPORTS

35, 36, 82, 83, 165, 168, 261, 340, 378, 425, 427, 473, 502, 503

INTERLABORATORY PROGRAMMES (international)

37, 38, 84, 133, 134, 170, 215, 261, 298, 341, 381, 429, 475, 505, 506

TERMINOLOGY AND DEFINITIONS

Albus H → Prichard E
Neidhart B → Prichard E

Prichard E, Albus H, Neidhart B, Wegscheider W: Glossary of Analytical Terms (X) 171
Wegscheider W → Prichard E

BOOK REVIEWS

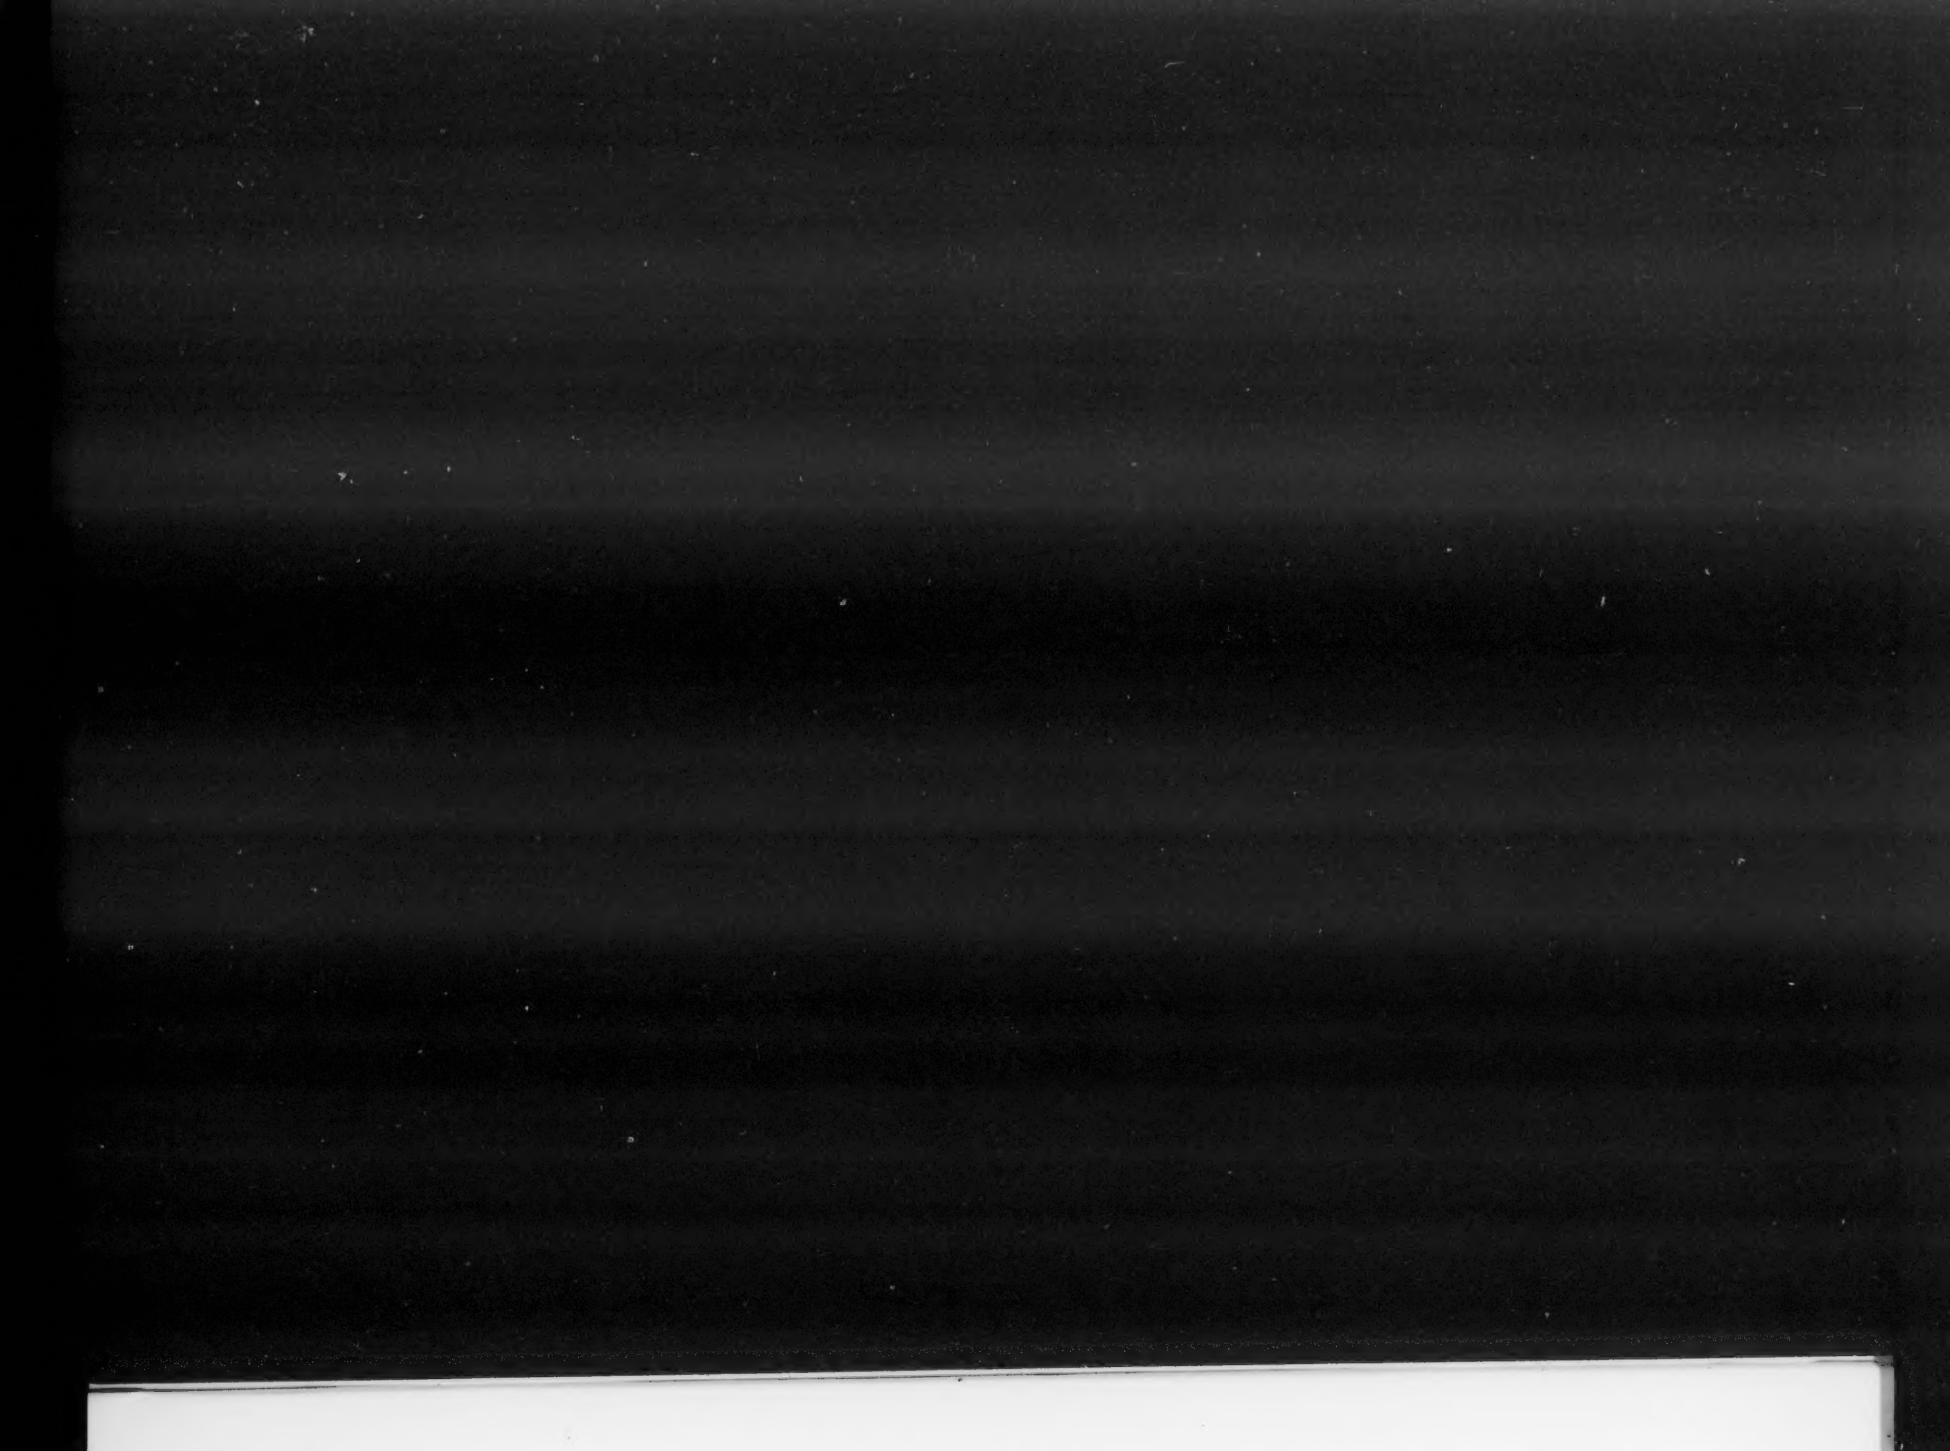
134, 513

NEW REFERENCE MATERIALS

Buzoianu M: List of Reference Materials 171
Pauwels J: BCR Certified Reference Materials 214
Thurlow KJ: CRMS from LGC 504

INTERNATIONAL COMMITTEES

39, 85, 173, 174, 216, 299, 340, 382, 475, 508, 512

CALENDAR OF EVENTS


41, 86, 136, 175, 217, 263, 302, 342, 384, 430, 477, 514
